 Tirane, Albania

SUMMARY

I am a backend and frontend developer with 1 year of experience, specializing in Python. My background in computer science and mathematics provides me with a strong technical foundation, while my hands-on experience has allowed me to build practical, impactful solutions.

I've developed tools such as an automated API testing system that runs checks after product changes to ensure nothing breaks or is affected unexpectedly. I'm currently working on project for API deprecations, built with a backend–frontend architecture. This system processes incoming feed messages, routes them through n8n, stores data in PostgreSQL, and provides an interactive UI where users can approve or deny changes.

With strong skills in Python, FastAPI, Docker, n8n, PostgreSQL and more, I focus on creating scalable, reliable systems that improve workflows and product stability.

EDUCATION

BACHELOR OF

SOFTWARE ENGINEERING

TIRANA, ALBANIA - 2022-2025

WORK EXPERIENCE

Software Engineer - **ISA Consulting**

OCTOBER 2024 - Present

- Assisted in the development and maintenance of backend systems utilizing Python, ensuring optimal functionality and performance. Acquired experience in writing simple, reusable code to support team projects. Collaborated with team members to integrate APIs, facilitating seamless communication between systems.

- Actively handle various product-related tasks with a direct impact on production code, demonstrating quick learning and adaptability to new features and technologies. Contribute to frontend platform UI enhancements, improving usability and user experience.
- Take ownership of tasks, efficiently managing priorities and delivering results under tight deadlines.

SKILLS

- Python
- React.js
- N8N
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
